

# Floating Production What's New in February 2016

Jim McCaul – IMA/World Energy Reports

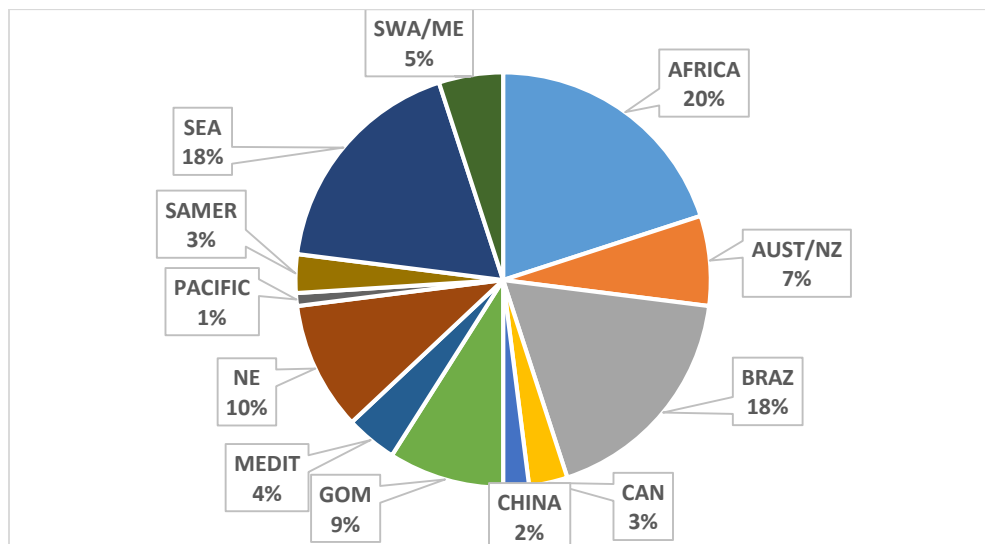

## WER February Floating Production Report

The February WER report looks at the future prospects of three FPSOs recently released from field, describes the competition for an elusive West African FSRU contract, reviews Hoegh's decision to join Excelerate in exiting the FLNG market, assesses Petrobras timing and ability to proceed with two pre-salt FPSO tenders and discusses Chevron's rationale in cancelling a GOM ultra-deepwater project.

In the data section of the report are details for 257 floater projects in the planning stage, 62 production or storage floaters now on order, 280 floating production units currently in service and 30 production floaters available for redeployment contracts.

Charts in the report update the location where floating production and storage systems are being planned, operating, being built and to be installed. Accompanying excel spreadsheets provide the report data in sortable format. Information is current as of 22 February.

**Breakdown of 257 Planned Projects by Region  
(as of February 2016)**

## About IMA/World Energy Reports

World Energy Reports provides business intelligence to the floating production industry. WER was formed in 2014 by IMA and Marine Link. IMA has been analyzing the floating production

industry for over 20 years. Marine Link is the world's leading publisher of maritime news. Together we have created a business intelligence service in the floating production sector with no equal.

We offer a comprehensive package of monthly reports, online database and market support.

- Our monthly reports provide a detailed snapshot of the business sector as of the middle of each month. More than 80 pages of data and industry analysis each month. Excel spreadsheets with each report enable you to tailor the data presentation to your needs. In October of each year we provide a detailed five year forecast of production floater orders. In March of each year we fine tune the forecast and make revisions as needed.
- The online database is updated every day – with information direct from primary sources. In the database are details for 250+ planned projects, 370+ installations in service, 65+ floaters on order and 20+ floaters available. The database is fully searchable. Personalized charts and spreadsheets can be directly produced from the database.
- We offer full support to subscribers. We will assist with questions about information in the database and reports – and our IT manager will assist with any questions about using the database search tools.

To receive more information or get a trial subscription, please contact Jean Vertucci at 212 477 6700 or email to [vertucci@marinelink.com](mailto:vertucci@marinelink.com). Information about WER is also available at [www.worldenergyreports.com](http://www.worldenergyreports.com).

#### *About Jim McCaul*
